

## Quiz-2

CLO-1 (Employ linear data structures to solve computing problems.)

### Question 1:

Apply the stack data structure to convert the following infix expression to postfix:

$$(A-B+C) / (D^E / F * G)$$

Show each step of the conversion process.

hint: you can complete the table below:

Step	Symbol Read	Stack Content	Postfix Expression
1	(	(	
2	A	(	A
